25X1X

The attached photographs of Soviet guns were taken at the DOEBERITZ (N 53/2 65) railroad station.

25X1A

Comment:

- The indistinct photographs show in the foreground a gun on outrigger-type mount resembling the German 88-mm AT gun, model 1943. The type of wheels of the gun mount has not been known before. It has not been reported that this most modern type of German AT gun was used or further developed by the Soviets.
- To the left of the AT gun is a rocket launcher-like small weapon which cannot be identified. It may be the repeatedly mentioned recoilless AT weapon of type SPG or SAPOG.
- Several Soviet 57-mm AT guns, model 43, are visible in the background.

1 Annex: Envelope with photographs.
